LOGISTICS STATUS -

Eric Paisley will be demobilizing for a few days beginning Monday, the 11th. He will return on the 16th. Our on-site Logistics Support Contractor (HCl) representative will continue to provide logistics support to Charlie Branch and will coordinate any new requests received through Eric who will continue to coordinate with me as needed via cell etc. Charlie Branch as well as the Charlie Branch Camp are both fully operational with all RV's in place along with associated daily services, water, power, sewer, fuel etc. A full time HCl sub-contractor is on site, devoted to maintaining the RV's and associated equipment such as the shower and latrine trailers. See attached video. Derek Ragon will remain in the field at Alpha Branch and will continue to provide logistical support there through the on-site HCl representative at that location. The Alpha Branch Camp has been fully operational for some time now with all RV's in place along with associated daily services, water, power, sewer, fuel etc. A full time HCl sub-contractor is on site, devoted to maintaining the RV's and associated equipment such as the shower and latrine trailers. Derek also remains in contact with me on an as needed basis and both locations will provide lodging updates as personnel mob in and out.

When Eric returns, Derek will demobilize, returning on the 29th. While Derek is out, the on-site HCl representative will continue to provide Logistics support to Alpha Branch and will coordinate with Eric as needed. Eric will rotate between both Alpha and Charlie Branches - spending time at each branch to ensure they are running smoothly etc. If Logistics support is needed elsewhere, Eric and HCl will provide. When Derek returns to Alpha Branch, Eric will work primarily from Charlie Branch and we, as a team, will continue to coordinate issues that arise. We do not anticipate needing to mobilize any other EPA personnel to provide field Logistics support for the remainder of this response.

Bravo Branch personnel will continue to be housed in several different hotels in the Houston area where we have blocks of rooms being held for EPA. No other Logistics support is known to be needed at this time.
